

To Schedule Your Opening...

1. You must **MAIL** in the contract, **CALL** the office, or **SUBMIT** the contract via email to confirm a date and provide payment.
2. Pay in full by March 29th & receive a \$40.00 discount. Otherwise, a 50% deposit is required to schedule.

If you do not secure your opening date by April 15th, we cannot guarantee your pool will be opened by Memorial Day Weekend.

IMPORTANT NOTICE

At Cool Pool we pride ourselves on doing complete, thorough, and professional work, first and foremost. Different winter conditions can lead to difficulties at startup, so we recommend opening 2 to 3 weeks before your intended use. This gives time to clear and balance the water and handle any unique problems that arise.

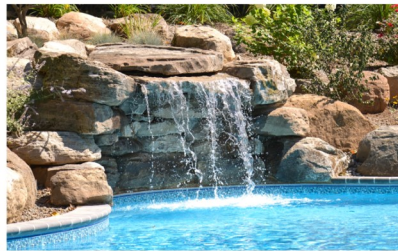

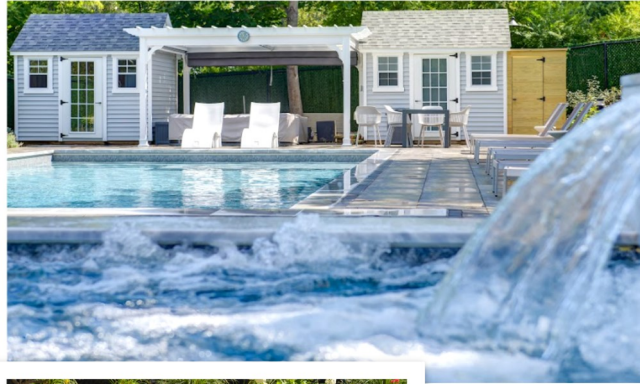

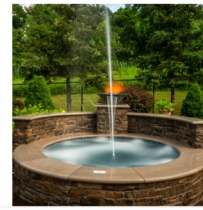

We are looking forward to a summer of swimming, sun and smiles!

Spring Assembly \$425.00 (Pool Only)

Our certified service technicians will reassemble and test all equipment, bleed gas lines, reinstall and prime system pumps, lubricate gaskets, and test your heater. This service includes the start up of waterfalls, slides, pool cleaner pump, and up to 2 additional system pumps. While on site, our technicians will check and replace minor parts, as needed and make recommendations for any additional repairs, services or items needed.

Any parts replaced during the opening services will be billable.

Additional Charges that may apply...

Attached Spa \$80.00

Autofill Line \$45.00

In Floor Cleaning System \$90.00

3 or more System Pumps \$35.00/pump

Heater Re-install \$50.00

Salt Cell Cleaning & Inspection \$45.00

Intellichem Maintenance

(Includes new peristaltic \$103.45 pH pump tubes)

Safety Fence Re-install \$50.00

Automatic Cover Services

Automatic Cover Maintenance \$699.00

Quick inspection and UV fabric

treatment \$120.00—Technician will clean tracks, inspect ropes and clean cover with a UV protectant.

DISCOUNT for Spring Assembly
\$40 OFF if paid in full by March 29th.
(No exceptions past date).

Clean & Store Cover Charges...

We will remove your cover, clean and store it on your property in the location you specify.

Please note: We are not responsible for any tearing of covers due to winter damage or normal procedures.

Mesh Safety Cover ...\$0

Solid Safety Cover ...\$88.00

Solid Cover with water bags ...\$99.00

All water must be pumped off prior to our arrival. Excess water and debris will incur an additional charge.

Initial Vacuum Service...\$250.00

This service is only available with our Spring Assembly Service. Our technicians will brush and vacuum away remaining buildup from the winter months. This service includes one touch vacuuming as needed. Start-Up Chemical required with this service; balancing chemicals not included.

The system should run 24 hours until a technician programs the pool schedule. Water cannot be tested and balanced accurately until the pool has had sufficient time to circulate.

Essential Start-Up Kit ...\$145.00

Includes 10 lbs. of shock, extra strength algaecide, and Non-Phosphate Stain & Scale Preventer. This winning combination will do all it can to clear the pool getting you swim ready sooner.

Drain & Clean Package...

Pricing dependent on pool size.

DISCOUNT for Drain & Clean Package

\$100 OFF if scheduled before April 20th.

It is recommended to completely empty the pool every 5 to 7 years to reduce the Total Dissolved Solids in the water, which can lead to poor water chemistry, algae issues and staining. We also recommend this service if you have not opened your pool the previous year or more.

This service includes pumping out all water, removal of debris, washing the pool surface with full strength muriatic acid or other cleaning agent, Spring Assembly and Start-Up Chemicals once the pool is refilled.

Any stains or discoloration not removed by full strength muriatic acid will be considered part of the pool's coating. If local permits are necessary for pumping water into drain sewers, it is the pool owner's responsibility to obtain them before we arrive. We will open the pressure relief valve for hydrostatic water pressure as the lowering of the water permits, but we cannot be responsible for pool movement due to ground water conditions.

When opening, if the water level is below the skimmers, our technicians will set up the system to run off the bottom drains until you add water to the pool. Once this is done, the skimmers can be turned on.

Our technicians will not put your pool cleaner into the pool until it has been manually vacuumed. Placing the pool cleaner into the pool that has too much debris can cause damage to the pool cleaner and add to the amount of time it takes to clean & clear your pool.

Due to liability, it is company policy that we do not install any equipment that is not purchased directly from Cool Pool.
